Dear Potential Partner,

This February, Bellarmine College Preparatory will invite more than 100+ high school students from across the Bay to a 12-hour hackathon on campus at our Lorry I. Lokey Academic Center. Our team has been working tirelessly to pack our schedules with workshops, mini-events, and prizes. Our goal as organizers is to make an unforgettable experience for an audience of eager hackers – a demographic often overlooked by online and university-hosted hackathons. For example, during MLH's 2023 season, over 80% of hackathons disallowed high schoolers.

What is a Hackathon?

A hackathon is a collaborative and intensive event where participants, often software developers, come together to work on innovative projects or solve specific problems within a set time frame, typically ranging from a few hours to a few days. Participants form teams and use their coding and problem-solving skills to create functional prototypes, applications, or solutions. The goal is to foster creativity, teamwork, and the rapid development of new ideas, often resulting in the presentation of final projects to a panel of judges for evaluation.

As a sponsor, you will...

Brand yourself as a supporter of innovation, diversity, and fun

Outreach to high schoolers interested in STEM

Promote your company's newest technologies

No matter the size of your company, there are always unique opportunities for you to participate in BellHacks.
